HL7 Sweden FCP Compliancy Policy

As a committed participant in the HL7 FHIR Community Process (FCP), HL7 Sweden recognizes the strategic importance of the HL7 FHIR standard in enabling semantic interoperability across health systems in Sweden, Europe and Internationally.

HL7 Sweden actively contributes to the development, harmonization, and adoption of HL7 FHIR Implementation Guides (IGs) that align with Swedish policy priorities, including the European Health Data Space (EHDS) regulation.

We affirm our adherence to the HL7 FCP Compliance Policy, supporting transparency, collaboration, and alignment with the global HL7 FHIR standard. Through our participation in the FCP, we aim to foster open, consensus-driven innovation to ensure high-quality and widely adoptable Swedish FHIR specifications.
